

# **DCS Codex Mobile App**

## **Use Case Specification**

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo  
Faculty Member  
Department of Computer Science  
College of Engineering  
University of the Philippines, Diliman

Submitted by:

Borja, Kim  
Pilipina, Jigger Angelo  
Valencia, Ian Benedict

In partial fulfillment of academic requirements  
for the course  
CS 191 Software Engineering I  
of the  
1<sup>st</sup> Semester, AY 2017-2018

**Unique Reference:**

The documents are stored in the <https://github.com/kimmu/DCS-Codex-Mobile-App>.

File reference: *DCS-Codex-Mobile-App/02-Requirements Engineering/2.1 – Approve Request.pdf*

**Document Purpose:**

The purpose of this document is to describe scenarios concerning the specified use-case.

**Target Audience:**

This document is useful for developers who would like to extend the mobile application in the future.

**Revision Control***History Revision:*

<b>Revision Date</b>	<b>Person Responsible</b>	<b>Version Number</b>	<b>Modification</b>
09/30/17	Borja, Kim	1.0	Initial Document

*Use-Case Name:* 2.1 Approve Request

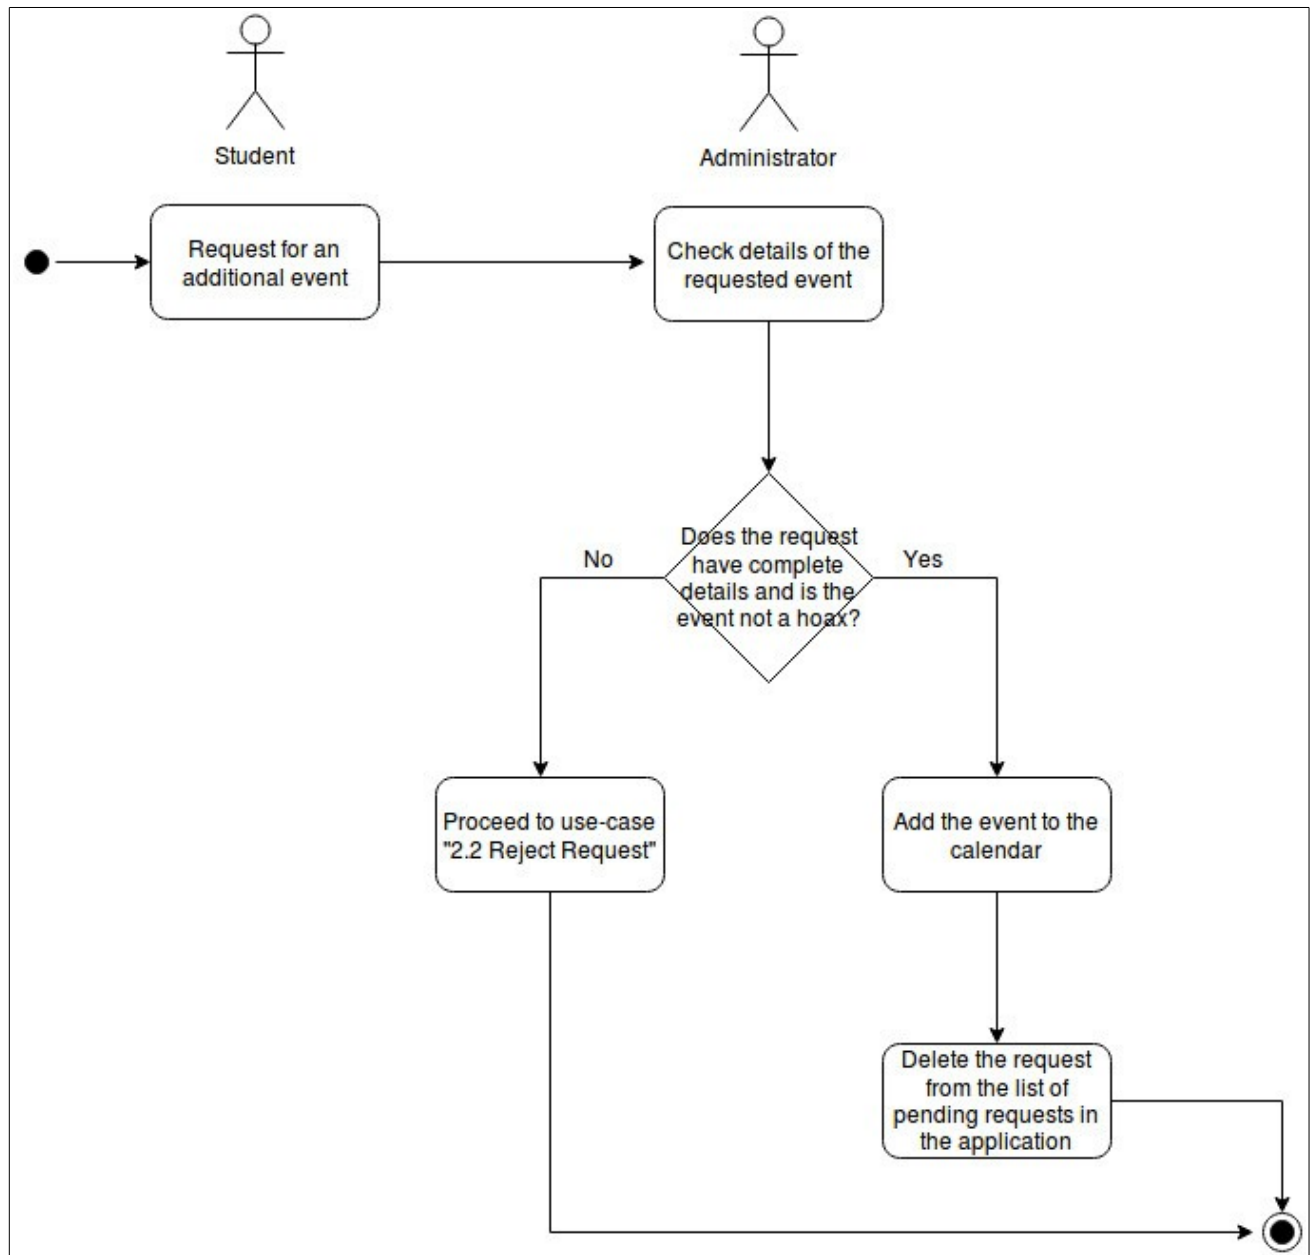

*Description:* If the request for additional event from the student has complete details and is not a hoax, the administrator approves the request by adding the specified event to the calendar. This is done manually through the database.

*Preconditions:* The administrator must have read the details of request from the student.

*Flow of Events:*

<b>Scenario Name</b>	<b>Description</b>
Scenario 1 The administrator approves a request for an additional event.	1. The administrator checks if the details of the requested event are complete and the event is not a hoax. 2. Add the event to the calendar. 4. Delete the request from the list of pending requests in the application.
Scenario 2 The administrator rejects the request.	See use-case "2.2 Reject Request" in 02-Requirements Engineering folder in Github.

### Activity Diagram of the Flow of Events:

*Postcondition:* The administrator must have added the requested event of the student to the calendar if the event is not a hoax and has complete details.

*Relationships:* This use-case extends "2.0 Manage Requests".

*Special Requirements:*  
None.
