Use-Case Name: 1.0 View Requests

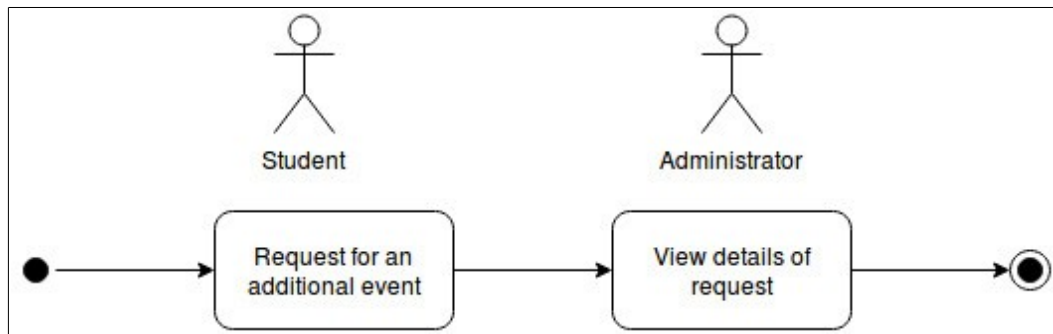

Description: The administrator has to check every request for additional event from the students/users. This is done manually through the database. After viewing every request, the administrator shall proceed to the next use-case (2.0 Manage Requests).

Preconditions: A student must have sent at least a single request for an additional event to the administrator.

Flow of Events:

Scenario Name	Description
Scenario 1 The administrator views a request from the student.	1. The student sends a request for an additional event (6.0 Request Event). 2. The administrator views the details of the request.

Activity Diagram of the Flow of Events:

Postcondition: The administrator must have read the request at this point and should be able to decide whether to accept or reject it.

Relationships: None.

Special Requirements:
None.
