Revision Date	Person Responsible	Version Number	Modification
09/30/17	Borja, Kim	1.0	Initial Document

*Use-Case Name*:   2.0 Manage Requests

Description: After checking a request for an additional event from the student, the administrator has to accept or reject the request. If accepted, the administrator shall proceed to use-case 2.1 (Approve Request). Otherwise, the administrator shall proceed to use-case 2.2 (Reject Request).

Preconditions: The administrator must have read the details of request from the student.

Flow of Events:

Scenario Name	Description
Scenario 1 The administrator approves a request for an additional event.	See the use-case specification for "2.1 Approve Request" in 02-Requirements Engineering folder in Github.
Scenario 2 The administrator rejects a request for an additional event.	See the use-case specification for "2.2 Reject Request" in 02-Requirements Engineering folder in Github.

Activity Diagram of the Flow of Events:

Postcondition: The administrator must have accepted or rejected the request from the student.

Relationships: This use-case is extended by use-cases "2.1 Approve Request" and "2.2 Reject Request".

Special Requirements:
        None.
